

CRYOPRESERVED AMNIOTIC MEMBRANE ALLOGRAFT

INJECTABLE TO AID
IN JOINT SUPPORT AND PROTECTION

WHY AMNIOTIC MEMBRANE?

Human amniotic membrane forms the innermost layer of the placenta. The thin and avascular membrane acts as a protective barrier for the developing fetus. Its properties provide a wide variety of potential benefits in regenerative medicine.

NATURAL

SurForce[®] is manufactured from donated placental tissue acquired from scheduled cesarean section

HYALURONIC ACID

Research shows that these tissues naturally contain hyaluronic acid¹

PROTECTIVE SUPPORT

A primary function of the amniotic membrane is to provide a protective barrier and support for the developing fetus

IMMUNOGENICITY

The amniotic membrane has unique immunological properties that will not trigger immune rejection²

WHY SURFORCE[®]?

Excellion[®]
Process

*Defined by our focus on safety, quality,
and value for patients and providers alike.*

SurForce[®] is produced using the Excellion[®] process. This process extracts the membrane from the placental tissue, leaving only the amniotic membrane layer which is then processed into an injectable product. This process is a tightly controlled aseptic procedure regulated under Section 361 of the Public Health Service Act. SurForce[®]'s patented process retains the natural properties of the amniotic membrane so that it can be used in a variety of treatment applications.

Product Information

Learn more about SurForce®

SurForce® is regulated under Section 361 of the Public Health Service Act and is intended for homologous use.

SurForce® Applications

- + Orthopaedics
- + Podiatry
- + Sports Medicine
- + Pain Management

Potential SurForce® Benefits

Joint Cushioning
Protective Support
Non-Steroidal
All-Natural

What is SurForce®?

SurForce® is an injectable amniotic membrane allograft that is derived from a donated placenta obtained via cesarean delivery. It is cryopreserved to retain the natural properties and benefits of the amniotic membrane.

| FEATURES | SURFORCE® | PRP | BMA |
|------------------------|-----------|---------|---------|
| Cryo-preserved | YES | X | X |
| Scaffold | YES | X | X |
| Non-invasive Procedure | YES | X | X |
| Structural Tissue | YES | X | X |
| Procedure Time | 15 min | 1-2 hrs | 2-4 hrs |

Is SurForce® Safe?

SurForce® is thoroughly tested for safety. We pride ourselves on safety standards that exceed regulatory requirements by performing additional serological and endotoxin tests often missed by our competitors.

Vial Sizes

SurForce® comes in multiple vial sizes tailored to a variety of injection locations

Inspected for Quality

All vials are measured using an electronic pipette, and quality personnel inspect all filled vials to ensure they meet our unparalleled standards.
